Mathematics — Algebra Basics

Quick offline notes (study-ready formulae + key ideas):

Solve: ax + b = 0 => x = -b/a
Quadratic: ax^2 + bx + c = 0
x = (-b ± sqrt(b^2 - 4ac)) / (2a)
Distributive: a(b + c) = ab + ac
Exponent: a^m * a^n = a^(m+n)
Check answers for restrictions/extraneous roots

Tip: open the PDF and try 3 practice questions from your course notes.
