Mathematics — Calculus Introduction

Quick offline notes (study-ready formulae + key ideas):

Rules: (u+v)'=u'+v', (uv)'=u'v+uv'
Integral: ∫ f(x) dx = F(x) + C
FTC: d/dx ∫_a^x f(t) dt = f(x)
Area idea: integral as 'accumulated' slices
Slope/Rate connects graphs to formulas
Practice: differentiate then substitute numbers

Tip: open the PDF and try 3 practice questions from your course notes.
