Science — Physics Basics

Quick offline notes (study-ready formulae + key ideas):

Newton 1: ΣF = 0 => velocity is constant
Newton 3: forces come in action-reaction pairs
Kinematics: v = u + a t
Kinematics: s = u t + (1/2) a t^2
Energy: KE + PE + thermal = bookkeeping
Momentum: p = m v (conserved in collisions)

Tip: open the PDF and try 3 practice questions from your course notes.
