Mathematics — Trigonometry Notes

Quick offline notes (study-ready formulae + key ideas):

Identity: sin^2 x + cos^2 x = 1
tan x = sin x / cos x
Pythagorean forms help simplify expressions
Double-angle: cos(2x)=cos^2x - sin^2x
Use unit circle for signs in different quadrants
Simplify first, then solve equations

Tip: open the PDF and try 3 practice questions from your course notes.
